Contents—Volume 22, 1991

Current Microbiology

© Springer-Verlag New York Inc. 1991

Number 1, January 1991

Noriaki Kishimoto, Yoshimasa Kosako, and Tatsuo Tano
Acidobacterium capsulatum gen. nov., sp. nov.: An Acidophilic Chemoorganotrophic Bacterium Containing Menaquinone from Acidic Mineral Environment 1

Rachid Lazraq, Sabine Clavel-Sérès, and Hugo L. David
Transformation of Distinct Mycobacterial Species by Suttle Vectors Derived from the *Mycobacterium fortuitum* pAL5000 Plasmid 9

Margaret Y. Gruber, Bernard R. Glick, and John E. Thompson
Escherichia coli-Anacystis nidulans Plasmid Shuttle Vectors Containing the P_L Promoter from Bacteriophage Lambda 15

A. Boulahrouf, G. Fonty, and Ph. Gouet
Establishment, Counts, and Identification of the Fibrolytic Microflora in the Digestive Tract of Rabbit. Influence of Feed Cellulose Content 21

Raphael Lamed, Ely Morag (Morgenstern), Orly Mor-Yosef, and Edward A. Bayer
Cellulosome-Like Entities in *Bacteroides cellulosolvens* 27

Tomonobu Kusano, Kazuyuki Sugawara, Chihiro Inoue, and Nobuhiro Suzuki
Molecular Cloning and Expression of *Thiobacillus ferrooxidans* Chromosomal Ribulose Bisphosphate Carboxylase Genes in *Escherichia coli* 35

Mario Pedraza-Reyes and Everardo Lopez-Romero
Detection of Nine Chitinase Species in Germinating Cells of *Mucor rouxii* 43

Abdel-Illah Qatibi, André Bories, and Jean-Louis Garcia
Sulfate Reduction and Anaerobic Glycerol Degradation by a Mixed Microbial Culture 47

Akira Hiraishi, Junta Sugiyama, and Kazuo Komagata
Simultaneous Formation of Menaquinones and Demethylmenaquinones by *Micrococcus varians* IAM 12146 Depending on Cell Growth Media 53

Michael J. North, David A. Cotter, and Karl J. Franek
Cysteine Proteinase Changes during Microcyst Formation and Germination in *Polysphondylium pallidum* 59

Christina M. Zarembinski, Jeffrey C. Hoyt, and Henry C. Reeves
Properties of Isocitrate Lyase from *Escherichia coli* K12 Grown on Acetate or Glycolate 65

Shi Liu, Li-Nuo Liang, and Joseph M. Suflita
The Metabolism of the Ground Water Contaminant 2-Hydroxybiphenyl under Sulfate-Reducing Conditions 69

Rafael Blasco, Jacobo Cárdenas, and Francisco Castillo
Regulation of Isocitrate Lyase in *Rhodobacter capsulatus* E1F1 73

Number 2, February 1991

Lawrence R. Zeph, Xiaoyan Lin, and Guenther Stotzky
Comparison of Three Nonradioactive and a Radioactive DNA Probe for the Detection of Target DNA by DNA Hybridization 79

Jacqueline Debette
Isolation and Characterization of an Extracellular Proteinase Produced by a Soil Strain of *Xanthomonas maltophilia* 85

Gerhard Burchhardt, Anja Wienecke, and Hubert Bahl
Isolation of the Pullulanase Gene from *Clostridium thermosulfurogenes* (DSM 3896) and Its Expression in *Escherichia coli* .. 91

Å. Ljungh, L. Emödy, P. Aleljung, O. Olusanya, and T. Wadström
Growth Conditions for the Expression of Fibronectin, Collagen Type I, Vitronectin, and Laminin Binding to *Escherichia coli* Strain NG7C 97

M. Carmen Gutiérrez, Antonio Ventosa, and Francisco Ruiz-Berraquero
Deoxyribonucleic Acid Relatedness among Strains of the Moderately Halophilic Species *Deleya halophila* 103

Lynne Miguel and R. Meganthan
Electron Donors and the Quinone Involved in Dimethyl Sulfoxide Reduction in *Escherichia coli* 109

M.V. Walter, L.A. Porteous, V.J. Prince, L. Ganio, and R.J. Seidler
A Microcosm for Measuring Survival and Conjugation of Genetically Engineered Bacteria in Rhizosphere Environments 117

Nam Woo Kim and V.L. Chan
Genomic Characterization of *Campylobacter jejuni* by Field Inversion Gel Electrophoresis 123

Anne Morris Hooke, Renee C. Palecek, Theresa M. Palecek, and Deidre R. Miller
Spontaneous Temperature-Sensitive Mutants of *Pseudomonas cepacia*: Isolation and Utilization 129

Bradley M. Krohn and James A. Lindsay
Purification, Characterization, and Comparison of an α-Glucosidase (Endo-Oligo-1,4-Glucosidase) from the Mesophile *Bacillus subtilis* and the Obligate Thermophile *Bacillus caldolyticus* 133

Number 3, March 1991

Raymond H. Widen, Catherine A. Newton, Thomas W. Klein, and Herman Friedman
Legionella pneumophila-Induced IL-1: Responses of Murine Peritoneal, Splenic, and Pulmonary Macrophages 143

A.G. Tkachenko, G.F. Rosenblat, A.A. Chudinov, and M.B. Raev
The Role of the Cell Energetic Status and Polyamines in Phospholipid Content of Membranes in *Escherichia coli* in the Course of Aerobic-Anaerobic Transitions 151

S.B. Rahalkar, S.R. Joshi, and N. Shivaraman
Biodegradation of Aromatic Compounds by *Rhodopseudomonas gelatinosa* 155

Saheer E. Gharbia and Haroun N. Shah
Utilization of Aspartate, Glutamate, and Their Corresponding Peptides by *Fusobacterium nucleatum* Subspecies and *Porphyromonas gingivalis* 159

Donat-P. Häder, Shi-Mei Liu, and Karlheinz Kreuzberg
Orientation of the Photosynthetic Flagellate, *Peridinium gatunense*, in Hypergravity 165

Tshilidzi N. Muthivhi, Rosa C. Gromkova, Pamela E. Sharp, and Hendrik J. Koornhof
Lysogeny in Encapsulated and Nontypable Strains of *Haemophilus influenzae* 173

Hsiu-Ping P. Lin and Henry C. Reeves
Phosphorylation of *Escherichia coli* $NADP^+$-Specific Glutamate Dehydrogenase 181

M.A. Rivadeneyra, R. Delgado, E. Quesada, and A. Ramos-Cormenzana
Precipitation of Calcium Carbonate by *Deleya halophila* in Media Containing NaCl as Sole Salt 185

Concepción García Mendoza, Amelia Pérez Cabo, Mª Luisa Sánchez González, and Monique Novaes-Ledieu
Morphological and Ultrastructural Studies on Protoplast Production and Reversion of the Higher Basidiomycete *Agaricus bisporus* 191

Francesco Galdiero, Caterina Romano Carratelli, Concetta Bentivoglio, Immacolata Nuzzo, and Marilena Galdiero
Microviscosity of Mouse Splenocyte Cytoplasmic Membrane Modified by Some Antibiotics 195

Nuzha M. Al-Taho, Sami H. Al-Amad, Fadilah A. Al-Salameen, Ekkehard Spanier, and Mohammad Z. Haider
Host-Vector Systems for the Thermotolerant Methanol-Utilizing Bacteria *Methylophilus* spp. KISRI-Strains 199

Number 4, April 1991

Marta E. Farías, Ana M. Strasser de Saad, Aída A. Pesce de Ruiz Holgado, and Guillermo Oliver
Purification and Properties of L-Serine Dehydratase from *Lactobacillus fermentum* ATCC 14931 205

R.E. Calza
Carbon Source, Cyclic Nucleotide, and Protein Inhibitor Effects on Protein and Cellulase Secretions in *Neocallimastix frontalis* EB188 213

Bawa Awumbila and Ricardo F. Rosenbusch
Metabolism Inhibition as a Result of Interaction of Antibody with a Membrane Protein of *Mycoplasma bovoculi* 221

Mary E. Goodsell, Julianna Toth, John L. Johnson, and Cecil S. Cummins
Two Types of *Propionibacterium avidum* with Different Isomers of Diaminopimelic Acid 225

Brian S. Miller, Timothy K. Kennedy, and Uldis N. Streips
Molecular Characterization of Specific Heat Shock Proteins in *Baccillus subtilis* 231

Yuji Oda and Kozo Ouchi
Discrimination of *SUC* Gene from *MAL*-Constitutive Gene by the Fermentability of Fructooligosaccharide in the Yeast *Saccharomyces cerevisiae* 237

G. Blanco, F. Ramos, J.R. Medina, J.C. Gutierrez, and M. Tortolero
Conjugal Retrotransfer of Chromosomal Markers in *Azotobacter vinelandii* 241

Priscilla O. Devadoss, Melvin E. Klegerman, and Michael J. Groves
A Scanning Electron Microscope Study of Mycobacterial Developmental Stages in Commercial BCG Vaccines 247

Yvona Sykora and Alpha M. Charles
Protein Phosphorylation in the Facultative Chemolithotroph *Thiobacillus novellus* 253

B. Gay Elisha and Lafras M. Steyn
Cloning of AAC(3) and AAD(2") Genes from *Acinetobacter*: Differential Expression in the Host Strain 259

Verónica E. García, Daniel O. Sordelli, M. Magdalena Gherardi, and Anne Morris Hooke
Humoral Immunity Induced in the Lower Respiratory Tract by Local Immunization with a Temperature-Sensitive Mutant of *Pseudomonas aeruginosa* 265

Number 5, May 1991

Bradley M. Krohn and James A. Lindsay
Purification and Characterization of a Thermostable α-Glucosidase from a *Bacillus subtilis* High-Temperature Growth Transformant 273

Zhang Ning, Graeme T. Attwood, Robin A. Lockington, and John D. Brooker
Genetic Diversity in Ruminal Isolates of *Selenomonas ruminantium* 279

A.D. Sawant, Manal Gabriel, M.S. Mayo, and D.G. Ahearn
Radiopacity Additives in Silicone Stent Materials Reduce In Vitro Bacterial Adherence 285

Mary L. Droffner and Nobuto Yamamoto
The Leucine Operon Carrying the *leu-500* Promoter Mutation Is Expressed under Anaerobic Conditions 293

Andre Brokamp and Friedrich R.J. Schmidt
Survival of *Alcaligenes xylosoxidans* Degrading 2,2-Dichloropropionate and Horizontal Transfer of Its Halidohydrolase Gene in a Soil Microcosm 299

Igor B. Zhulin, Igor B. Gibel, and Vladimir V. Ignatov
A Rapid Method for the Measurement of Bacterial Chemotaxis 307

S. Marvin Friedman, Mary L. Droffner, and Nobuto Yamamoto
Thermotolerant Nalidixic Acid-Resistant Mutants of *Escherichia coli* 311

Jo Handelsman, William C. Nesmith, and Sandra J. Raffel
Microassay for Biological and Chemical Control of Infection of Tobacco by *Phytophthora parasitica* var. *nicotianae* 317

Charles P. Chapman, Joseph F. Ross, and Michael Orlowski
Regulation of Macromolecular Synthesis during Nutritional Shift-Up in the Fungus *Mucor* 321

Martine Charvin, Nalin Rastogi, and Véronique Vincent Lévy-Frébault
An Easy and Rapid Method for Isolation of Entire Mycobacterial Genome for Application in Pulsed-Field Gel Electrophoresis 327

Number 6, June 1991

Toshio Shimada, Yoshimasa Kosako, Kohaku Inoue, Masahito Ohtomo, Shigeru Matsushita, Sumio Yamada, and Yasuo Kudoh
Vibrio fluvialis and *V. furnissii* Serotyping Scheme for International Use 335

Michael Bröker
Identification of the Yeast Genus *Schizosaccharomyces* by a Murine Monoclonal Antibody 339

L. Arlene Porteous and John L. Armstrong
Recovery of Bulk DNA from Soil by a Rapid, Small-Scale Extraction Method 345

Isamu Yamamoto, Masato Hinakura, and Hiroyuki Kondo
Location of Anaerobic Respiratory Enzyme Trimethylamine N-Oxide Reductase in the Cytoplasmic Membrane of *Escherichia coli* Strain K10 349

John M. Pemberton, Karen M. Vincent, and Robert J. Penfold
Cloning and Heterologous Expression of the Violacein Biosynthesis Gene Cluster from *Chromobacterium violaceum* 355

H. Keith Withers and Philip D. Bragg
Expression of Multiple Cytochrome b_{556} Species in Aerobically Grown *Escherichia coli* 359

Syed H. Imam, Anthony Burgess-Cassler, Gregory L. Cote, Sherald H. Gordon, and Frederick L. Baker
A Study of Cornstarch Granule Digestion by an Unusually High Molecular Weight α-Amylase Secreted by *Lactobacillus amylovorus* 365

Hsiu-Ping P. Lin and Henry C. Reeves
Purification and Characterization of $NADP^+$-Specific Glutamate Dehydrogenase from *Escherichia coli* 371

Philip D.A. James, Mohammed Iqbal, Clive Edwards, and Peter G.G. Miller
Extracellular Protease Activity in Antibiotic-Producing *Streptomyces thermoviolaceus* 377
